

Customer Information Notice CIN111

trophon® Companion Cleaning Wipes efficacy against SARS-CoV-2

A recent outbreak of a novel strain of coronavirus (SARS-CoV-2) has been reported leading the WHO to declare a Global Health Emergency. Coronaviruses have been the etiological agents of two major outbreaks in the past including severe acute respiratory syndrome (SARS) and Middle East respiratory syndrome (MERS). Symptoms can include fever, cough and shortness of breath. There are ongoing investigations on transmissibility, severity and other features of SARS-CoV-2.¹

trophon Companion Cleaning Wipes have demonstrated effectiveness against viruses similar to 2019 Novel Coronavirus (SARS-CoV-2) on hard, non-porous surfaces. Therefore, trophon Companion Cleaning Wipes can be used against 2019 Novel Coronavirus (SARS-CoV-2) when used in accordance with the directions for use against norovirus on hard, non-porous surfaces. Refer to the CDC website <https://www.cdc.gov/coronavirus/2019-ncov/index.html> for additional information.
